Read before Applying

- Use the beta firmware for your evaluation purpose only. If you have important or critical data on your Synology NAS server, be sure to back up the data to other location first. Synology holds no responsibility for any data loss due to the beta firmware.
- The beta firmware is NOT REVERSIBLE; you will not be able to downgrade your Synology product to the previous version.
- You will be responsible for reporting bugs and your suggestion to the Beta Program manager.
