

DX5

Synology DX5 delivers an effortless solution for volume expansion and data backup for 2009 Synology Disk Station. It not only helps users smoothly expand the Synology Disk Station DS509+ capacity to 10 hard drives on the fly, but also can be used as a perfect backup solution.

Key Features

- Plug-n-use
- Hot-swappable HDD design
- Hibernation
- Managed from Synology Disk Station Manager 2.1

When running out of the hard drive capacity on Synology Disk Station DS509+, users can expand more storage with Synology DX5. By attaching it to Synology Disk Station DS509+, the plug-n-use connectivity and eSATA 3.0 Gb/sec definition allow users to expand volume from Synology Disk Station DS509+.

Synology DX5 delivers a perfect backup solution for Synology 2009 Disk Station, too. By attaching it to Synology 2009 Disk Station, the plug-n-use connectivity and eSATA 3.0 Gb/sec definition allows users to create an independent volume on the Synology Disk Station as a good backup target.

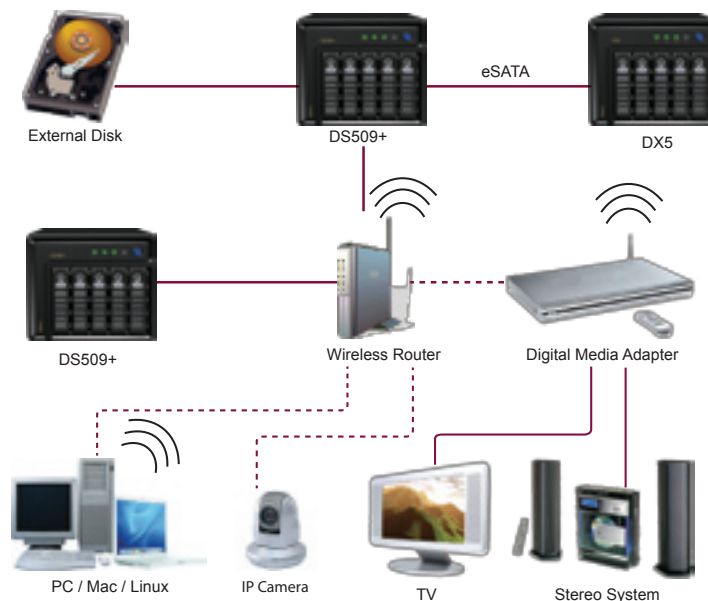

The HDD hibernation can be manually configured to take effect automatically when the system has been inactive for a period of time. This not only save energy but also extends the lifespan of the hard disk.

CONNECTIONS & BUTTONS

Synology DX5 can be directly managed from Synology Disk Station Manager 2.1. No firmware installation is needed.
