#### Network Video Recording **New!**

Synology Surveillance Station allows you to manage, view, and record videos from multiple IP cameras. Choose either the Continuous or Motion-detection recording mode that best fits your storage strategy.

#### AJAX Management UI **New!**

The AJAX management UI brings to you the familiar Windows experience. The My Favorites area and flexible layout allow you to customize your default login page.

#### Ultra-High-Speed Data Access

The Synology Small Businesses & Corporations Series provides speedy data transmissions and powerful computing capabilities, which makes it suitable for the small business and corporate environments that demand efficiency and heavy-load performance.

#### Website Publishing with PHP+MySQL

Synology Web Station's built-in Apache web server and PHP+MySQL allow you to build up a database-driven website for your organization, or simply install applications downloaded from the Internet.

#### Web-based File Access from Anywhere

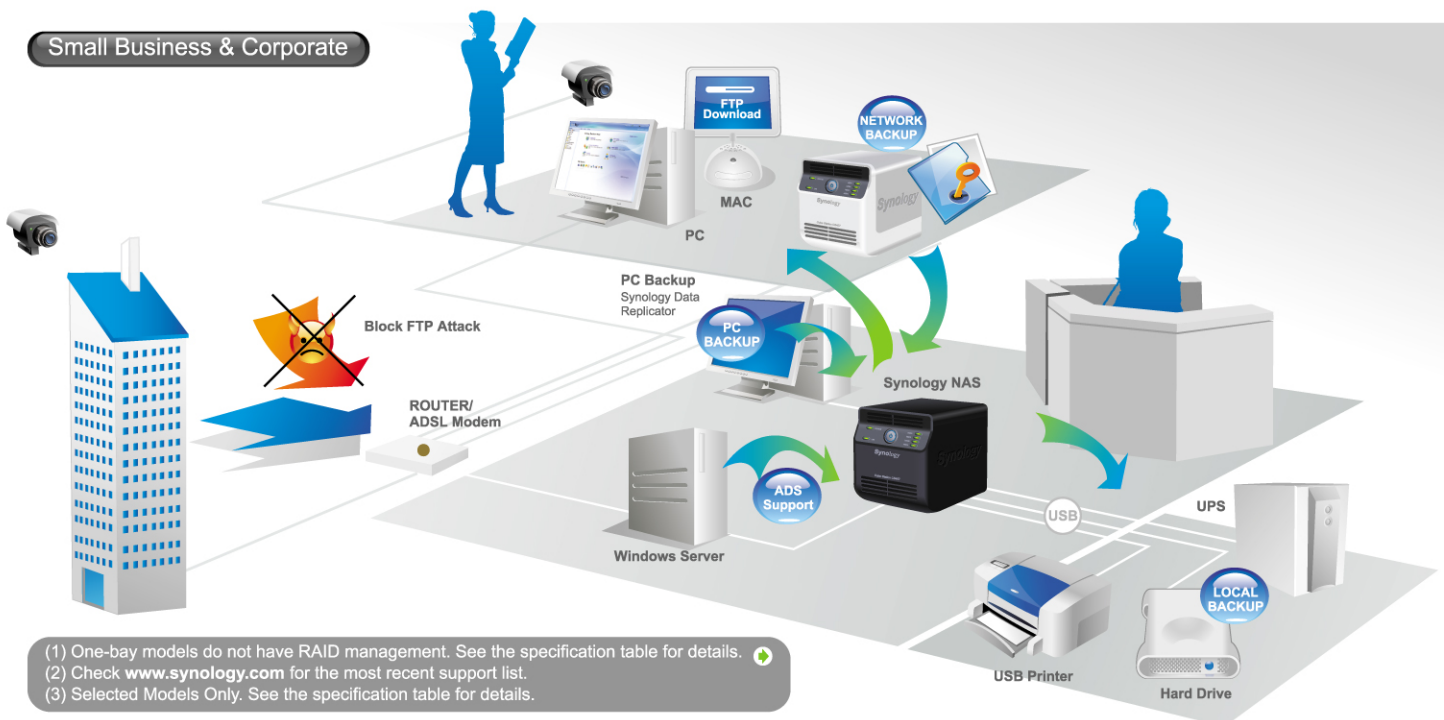

Synology File Station is a great way for you to access and manage files stored on the Synology NAS server from anywhere. The AJAX technology brings to you the Windows-like experience of organizing files with a web browser.

#### USB Printer Sharing

By connecting a USB printer<sup>(2)</sup> to the Synology NAS server, the printer is shared throughout the network. The Add Printer Wizard provided in Synology Assistant helps complete the printer setup with only a few clicks.

### Small Business & Corporate

(1) One-bay models do not have RAID management. See the specification table for details.

(2) Check [www.synology.com](http://www.synology.com) for the most recent support list.

(3) Selected Models Only. See the specification table for details.
